

Looking for Software?

Miami University has agreements with several software publishers (where applicable) to provide you with software to install on your computer. Unfortunately, each publisher has its own terms, so universal answers aren't easy, but this information should help you find answers.

Microsoft Windows & Microsoft Office

These titles are provided for all students by IT Services via the bookstore (first semester). For more information, see <http://www.muohio.edu/microsoft/> or call the IT Services Support Desk at 9-7900.

Other Microsoft Software

Other Microsoft titles including Visual Studio, Visio, Project, Virtual PC, and Windows Server 2003 are provided by the School of Engineering & Applied Science and the Regional Campus departments for students enrolled in courses in specific departments. If you are enrolled in a course in the CIT, CSA, ECE, ENT, NSG, MME, or PSE departments, log into http://msdn07.e-academy.com/mu_seas/ to obtain software.

RedHat/Fedora Linux

The School of Engineering & Applied Science has a mirror serving the Internet community through anonymous FTP at <ftp://mirror.eas.muohio.edu> or <http://mirror.eas.muohio.edu>.

If you are on campus, anyone may access this mirror with fewer restrictions on bandwidth and concurrent connections through anonymous FTP at <ftp://mirror-internal.eas.muohio.edu> or <http://mirror-internal.eas.muohio.edu>

SolidEdge

Students taking MME 143 may obtain SolidEdge through the department for a small fee to cover duplication. Otherwise, students taking MME courses who wish to obtain SolidEdge may do so at low or little cost directly from the publisher, EDS. Visit the following page for contact information: <http://www.solidedge.com/academic/>.

Eclipse

Eclipse is a free product available to anyone at <http://eclipse.org/downloads/>.

Minitab

This title is provided through IT Services for all faculty and students. To get a CD, visit Theresa Lumpkin at the Copy Center in 100 Gaskill. You must bring your Miami ID and sign a list that will be sent back to Minitab.

Oracle

The Oracle client software is available directly from Oracle's website: <http://www.oracle.com/technology/software/index.html>
